

## WHAT IS SUMMIT?

Sherpa **Summit** is a custom-scoped platform solution for organizational departments with more involved or complex internal or external virtual event and video streaming requirements. **Summit** has added security, scalability, and deployment options designed for high-impact events, sensitive or proprietary content, and everything in between.

## WHO IS IT FOR?

**Summit** is recommended for companies or organizations that have a deeper footprint with respect to video content, whether for internal communications, external communications, or both. Those with a firm understanding of what is necessary to accomplish their video streaming and virtual events strategy should consult a representative and develop a tailored Sherpa **Summit** solution for:

- High-profile, high-impact, high-volume virtual events
- Safeguarding and securely sharing proprietary, sensitive content with select groups or individuals
- Private cloud, hybrid, or on-premises video platform deployments

## KEY BENEFITS

As a custom-scoped solution **Summit** is designed for organizations that have specific needs in mind with respect to virtual events and video, and that need to manage an ever-growing library of live and on-demand video content. Sherpa **Summit** Treks yield many notable benefits for those that have developed a clear strategy around their video content, such as:

- **Reliable and high-quality** — take advantage of hardware and software offerings to ensure viewers and attendees experience your content at the best resolutions
- **Completely customizable** — use self-service branding to make the viewer experience wholly your own, and integrate with our APIs to develop custom functionality
- **Intelligent content management** — AI-powered features and analytics enable you to make data-driven decisions around your virtual events and videos
- **Secure platform** — leverage corporate security protocols (e.g. SAML/AD) and personalized watermarks to protect sensitive content
